3Q26 review: OP beats our estimate and consensus by 18%

The company posted 3Q26 consolidated sales of about W12tn (+18.3% YoY) and OP of W1,142.8bn (+15.0% YoY, OPM 9.5%), exceeding our estimate of W966.3bn by 17.6% and consensus of W971.7bn by 18.3%. Construction OP reached W277.0bn (+149.5% YoY, OPM 6.2%), with OPM improving by 1.1%p QoQ on solid progress at high-tech projects and the ramp-up of new overseas projects. Trading earnings moderated QoQ from a high 2Q base, but OP of W99.0bn (+30.3% YoY) exceeded our estimate.

Raises order guidance, further upside from data centers, nuclear power

New orders totaled W8,827.0bn in 3Q26, including the Taylor 1 FAB2 (W2.8tn) and the Daechi Eunma reconstruction project (W2.1tn), bringing cumulative orders to W19,275.0bn. High-tech orders reached W11.2tn in over 1Q-3Q26, exceeding guidance of W6.8tn by W4.4tn, and are expected to surpass W12tn for the full year. We believe the guidance upgrade reflects faster-than-expected high-tech order intake and overseas combined-cycle power projects replacing projects delayed by developments in the Middle East. Of the approximately W10.8tn in additional orders expected in 4Q26, plant projects should contribute over W4tn, including gas-fired power projects in Australia and combined-cycle power projects in Taiwan, followed by approximately W3tn from housing and over W1tn from building construction. For the Swedish SMR project, the company and GE Vernova Hitachi (GVH) were selected in September as partners for Studsvik's 1.2GW project (comprising four BWRX-300 reactors) and signed a joint development agreement. Following FEED Phase 1 in 2027 and Phase 2 in 2028, an EPC contract is expected in 2029, with construction scheduled to begin in 2030 and with completion targeted for 2035. Also in September, the company invested $70mn in Kairos Power, a developer of Generation IV SMR technology, securing preferred negotiating rights for the EPC contract for a future 450MW commercial SMR project in the US. It also invested $200mn in Helix, an AI infrastructure company established by KKR, targeting participation in EPC work for Texas data centers from 2028.

Maintain BUY and TP of W510,000; retain as our second construction pick

We maintain BUY and our target price of W510,000, and retain the company as our second pick in the construction sector. Improvement in construction earnings is already becoming evident, led by high-tech projects. We see ample upside if overseas data center and nuclear power projects also gain greater visibility.
